General Floor Care Tips

- Shake off all mats and vacuum daily to eliminate tracked in dirt and grit.
- Do not steam mop or wet mop bamboo or hardwood flooring. Avoid excess moisture from cleaning and mopping.
- Use felt or natural rubber-backed mats at entryways and high traffic areas to catch debris and protect the floors. Also, make sure all furniture legs are properly protected with felt or natural rubber protectors. Replace occasionally as those accumulate debris over time.
- Be careful not to drag heavy objects across the floor.
